OXORIO

SMART CONTRACTS AUDIT
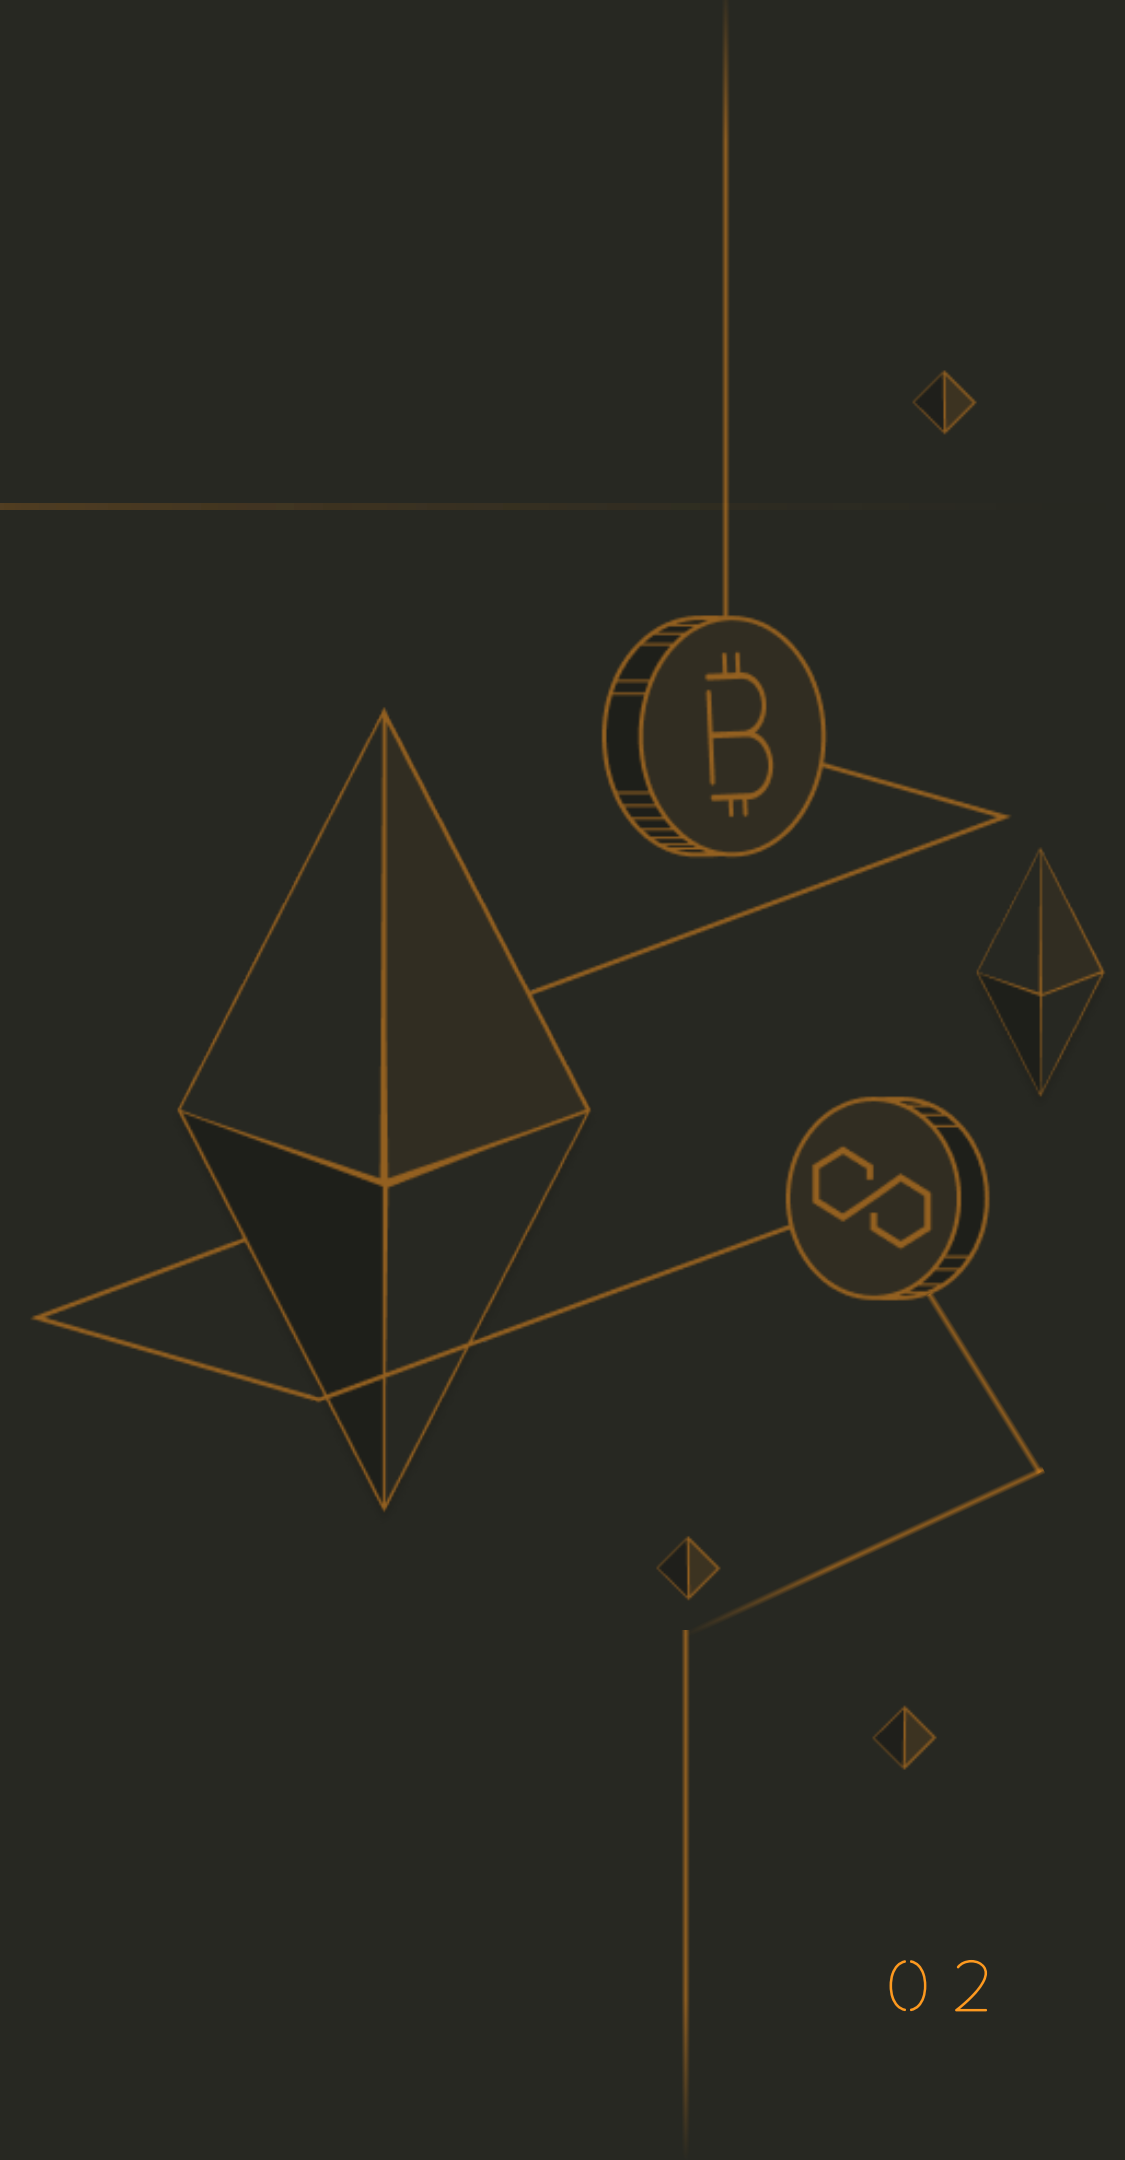

VULNERABILITY ANALYSIS

ABOUT US

We are OXORIO — a team of hackathon geeks that believes in the power of decentralization.

We specialize in providing unparalleled security and privacy solutions for blockchain-based projects:
high-quality smart contract audits and vulnerability analysis, and penetration testing.

Our expertise in smart contract security audits and zk-SNARKs-based solutions has made us a leading provider in the industry.

SMART CONTRACT AUDITS

Audit Methodology

Audit reports

How does it work

AUDIT METHODOLOGY

Our smart contract security audits follow a rigid process, aiming to find even the most creative and obscure vulnerabilities, exploits, and loopholes in protocol logic.

Our process includes:

- Extensive Manual Code Review

- Identification logical flaws

- Vulnerability Analysis and Detection
  (e.g., reentrancy, gas limit, flash loan attacks, etc.).

- Detect inconsistencies with the desired security model

- Verification of the fixed code version with all the recommendations and their statuses

AUDIT REPORTS

Going beyond industry standards, we provide value to developers and the wider community by including understandable context and risk information.

Our audit reports outline all of the logical errors, inconsistencies, and vulnerabilities discovered during the audit and recommendations for how to fix them.

LEVEL	AMOUNT
CRITICAL	10

HOW DOES IT WORK

CONTACT
Send us the scope, dates, and project details

ESTIMATE
We agree on the price and the deadline

AUDIT
We start the auditing process

PRELIMINARY REPORT
We send the preliminary report to your team

FIXES
Your team fixes the issues

FINAL REPORT
We examine your fixes, update, share and publish the final report

VULNERABILITY ANALYSIS AND PENETRATION TESTING

Infrastructure Vulnerability Analysis

Penetration Testing

Bug bounty consulting

Ongoing Security Monitoring

VULNERABILITY ANALYSIS

Our team of experts has a deep understanding of the latest security threats and trends in the web3 space, and we are dedicated to staying up-to-date with the latest technologies and best practices. Our services include:

INFRASTRUCTURE VULNERABILITY ANALYSIS

Perform a comprehensive review of your infrastructurere to identify any potential security vulnerabilities.

PENETRATION TESTING

Use simulated attacks to test the strength of your infrastructure, providing you with a thorough report of any vulnerabilities and recommendations for improvement.

BUG BOUNTY CONSULTING

Help you organize the entire bug bounty process from platform selection to recommendations for fixing vulnerabilities found.

ONGOING SECURITY MONITORING

Ongoing monitoring of your infrastructure to ensure that any new vulnerabilities are detected and addressed in a timely manner.
